S-Path

Specialized S-Path Delivery System
for 10Fr Pigtail stent

Novel Integrated **RX** Proprietary Self-detaching Tip
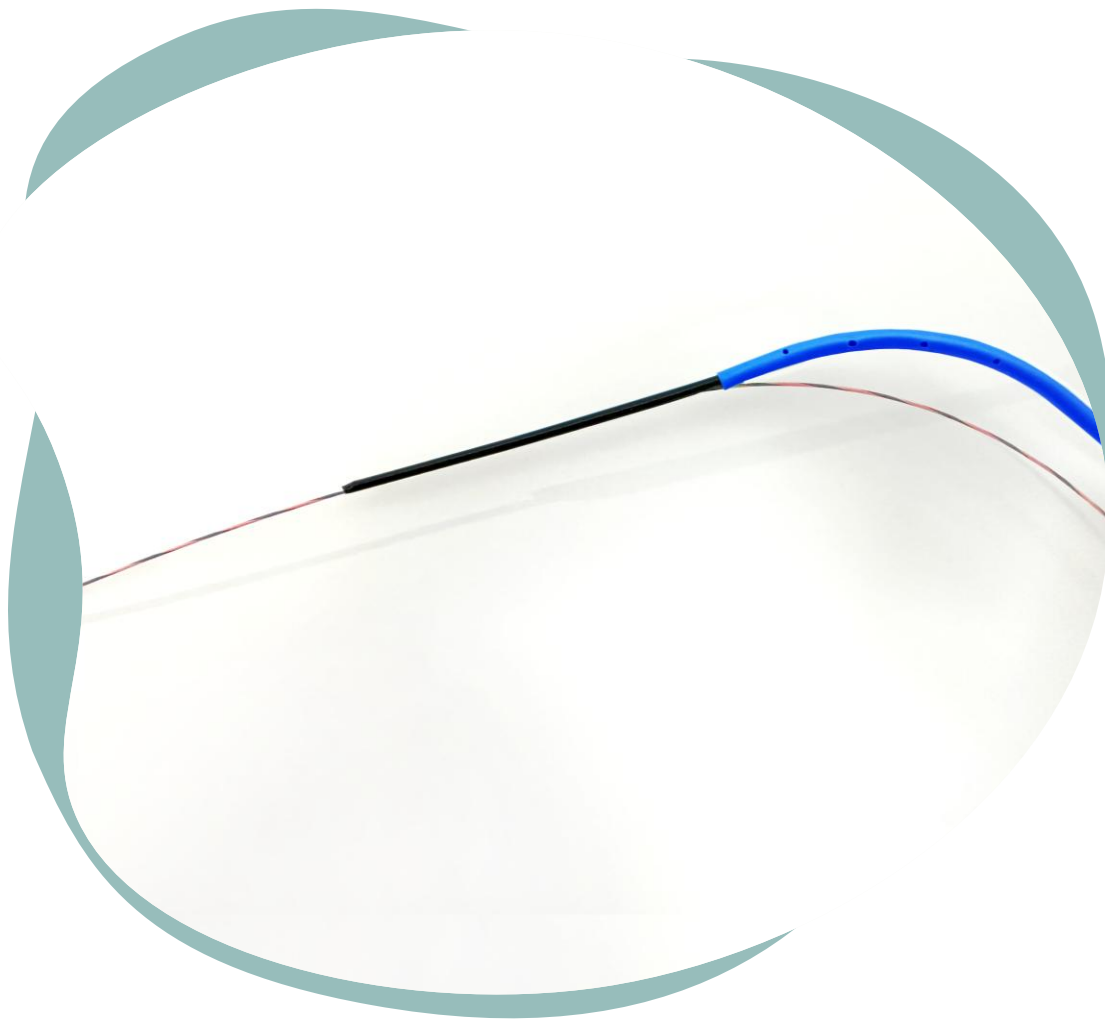

A Specialized short delivery system secures the guide-wire in place without manipulation, **after deploying** a **Pigtail** plastic stent.

LESS TIME & PROCEDURE STEPS
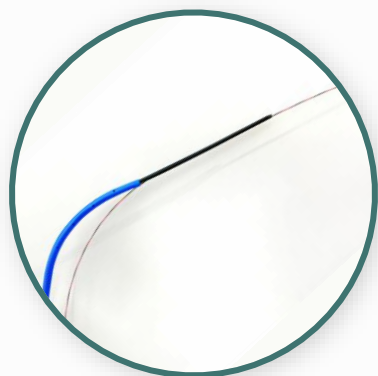

LESS RISKS

REDUCES COMPLICATIONS

EASY TO USE

FDA 510K Cleared

EndoGI S-Path™ system with the unique RX self-detaching tip platform increases procedural success and enables guide-wire access after each stent placement.
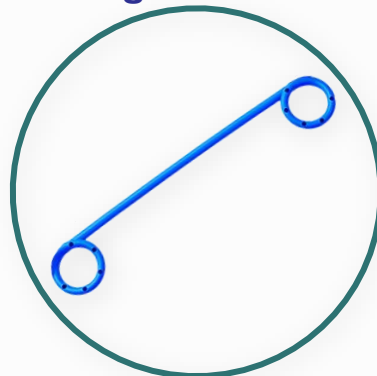

FEATURES:

S-PATH DELIVERY SYSTEM

Pigtail STENT

- **SELF-DETACHING PATENTED TIP**
- Tapered tip - atraumatic with better pushability
- Stent release indicator -

- Minimum Inner Diameter **2.4mm**
- **Minimum working channel 4.0 with guidewire 0.025"**
- Up to 15cm pigtail (280mm total length)

CLINICAL AND PROCEDURAL BENEFITS

One-time guidewire access.
No need to re-access after deploying a stent

Facilitates multiple stent deployment. **
Studies show that deploying multiple stents achieves higher clinical efficiency, and saves time by reducing procedural steps

Reduces complications and tissue trauma.
Lessens anesthesia & X-ray time, irritation and resistance

Compatible with all guidewire sizes and a 4.2 mm working channel. Consistent with standard guidelines and protocols
